Operation

⊙ Good Corporate Governance

The Company gives priority to good corporate governance in order to increase transparency and to build confidence in its employees, customers, shareholders, stakeholders and overall societies including both domestic and foreign general investors by the adoption of Corporate Governance Policy and Code of Conduct and Business Ethics. Whereas, the directors, consultants, executives and all employees of the organization are required to strictly adhere to the Corporate Governance Policies (Details are shown in the topic of Corporate Governance). The Company has established 6 CSR Working Groups to supervise the works relating to CSR, consisting of executives from all divisions as follows:

1. Corporate Social Responsibility Working Group, having the President presiding over it, having duties and responsibilities to set out, giving directions for operation including approving guidelines relating to the social responsibility;

2. Occupational Safety, Health and Environment Management System Committee (ISO 14001 & HOSAS 18001);

3. Quality Management System Committee (ISO 9001);

4. Energy Management Working Groups (ISO 5001);

5. Complaint Management Committee;

6. Welfare Committee.

All 6 Working Groups shall review the progress and work performance according to plans for Corporate Social Responsibility (CSR) 4 times per year.

⊙ **Fair Business Engagement** (Details are shown in the topic of Corporate Governance Chapter No. 3 – Regard for Role of Stakeholders.)

⊙ **Anti-corruption**

The Company has specified anti-corruption issues against any conflict of interest, forbidding bribery or alluring offer or acceptance as prescribed in the Corporate Governance Policy and Code of Conduct and Business Ethics to which the directors and employees must strictly adhere. Furthermore, if the internal audit result shows any point which will incur risk in the said issues, the Audit Committee shall inform Administration Division to proceed with inspection and resolve the said problem. In addition, the Company has the preventive operation against being involved with any corruption as follows:

1. Let both internal and external interested persons inform or make a complaint concerning any offences against laws, ethics, incorrect financial statements or defective internal governing system to the Chairman of the Corporate Governance Committee, including describe the measure to protect the informer's rights from any violation.

2. The employees witnessing any violation or disobedience against the Code of Conduct and Business Ethics shall notify the Senior General Manager at Human Resources and General Affairs Division for proceeding with the fact inspection. In case where any law violation is found, the result of fact inspection shall be informed to the General Affairs-Government Division for proceeding with the further civil and/or criminal action. In the case where the essential ethics of the organization is violated, the petitioner shall report the said violation to the Company's Audit Committee. In this regard, the Company has adopted measures to protect the informer's rights against any violation.

In the previous fiscal year, no complaint relating to any corruption violating laws, ethics, incorrect financial statements or defective internal governing system was informed to the Company by any means.

⊙ **Respect for Human Rights**

(Details are shown in the topic of Corporate Governance Chapter No.3 – Regard for Role of Stakeholders and on the website www.furnituressystem.com in the chapter of the Investor Relation.)

⊙ **Responsibility for Consumers and Corporation for Community and Society Development**

(Details are shown in the topic of Corporate Governance Chapter No.3 – Regard for Role of Stakeholders.)

⊙ **Environmental Management**

The Company has set the environmental policies for the purpose of managing and developing the environmental quality both in the factory and the surrounding areas starting from material, manufacturing process and package selections by considering the effect to the environment, providing the environmental management which strictly conform to environmental laws or regulations so that the Company is certified the environmental management standard ISO 14001 by the Bureau Veritas Quality International (BVQI) and the Green Label by the Thailand Environment Institute.

1. Raw material

The majority of raw material in the manufacturing process is steel produced in domestic part and imported from overseas depends on the qualities and prices. In the steel cutting process, the steel scraps are produced; however, they will be used in the other process for their maximum application namely being transformed into the smaller pieces which are the component of the steel product. The residue which cannot be transformed will be sold for being recycled and stored under control and correct managing plan causing no effect to the environment.

2. Press Line

The steel part cut from steel coil will enter the press line process producing by the pressing machine using hydraulic oil. The pressing machine will be maintained in order to prevent any hydraulic oil leakage, which has the proper management and storage plan causing no effect to the environment, and the used hydraulic oil will be sold for being recycled.

3. Spot and Welding Process

The effects caused by spot and welding process, e.g. heat, fume and combustion gas namely carbon dioxide, carbon monoxide or metallic fume, will be controlled by the installation of the Wet Scrubber in order to protect the environment from any effect. There is also a plan for inspection of fume and gas quantity in order to prevent the same from exceeding the standard values of the Department of Industrial Works and Pollution Control Department.

4. Painting Process The effects caused by the painting process are as follows:

1. Sewage from oil and grease cleaning process;
2. Sewage from iron phosphate coating process;
3. Color residue;
4. Precipitate produced by the sewage treatment system;
5. Polluted air from combustion (Drying and color-baking rooms) namely carbon dioxide and color fume.

Environment Control

1. Sewage produced by the manufacturing process will be treated in the chemical treatment system having standard and control of the waste water value subject to the standard of the Department of Industrial Works.

2. Polluted air will enter into the Wet Scrubber system in order to be treated prior to release, there is the inspection plan of the fume and gas quantity in order to prevent the same from exceeding the standard values of the Department of Industrial Works and Pollution Control Department.

3. Color residue and precipitate from the treatment system which is industrial residue will be delivered to the other company approved by the Department of Industrial Works for treatment with the proper and safe process for human and environment.

4. Environment will be controlled by the lawful supervisor namely the supervisor of the treatment systems for water, air and industrial residue pollutions.

Social and Environmental Disputes – In the previous year, no social and environmental disputes have arisen between the Company and other corporation.
